

# FAHAD SALIM DALWAI

+974 55470395 ◇ Chicago, Illinois

[dalwaifahad@gmail.com](mailto:dalwaifahad@gmail.com) ◇ [LinkedIn/FahadDalwai](#) ◇ [GitHub/fahaddalwai](#)

## SKILLS

**Languages** Java, Python, C, C++, SQL, Kotlin, HTML, CSS, JavaScript, Go, PHP, JavaScript (ES5/ES6)  
**Frameworks** Flask, Firebase, MySQL, SciKit, TensorFlow, JUnit, PyTorch, Node.js, FastAPI, Bootstrap, Vue.js  
**Libraries** AWS, REST APIs, Material UI, Docker, Jira, JQuery, Git, OpenCV, Dependency Injection  
**Skills** Front-end, Agile, Back-end, Unit testing, Micro-services, CI/CD, SCRUM, Kanban, DevOps

## WORK EXPERIENCE

### Ooredoo Qatar - Software Engineering Intern

Jan 2024 - April 2024

- **Developed** Internal knowledge base web app for 400+ employees using VueJS and Bootstrap for team-based repository storage. **Utilized** Elasticsearch and Kibana for document-wise searching and visualization of 10 team document statistics.
- **Engineered** backend using Go and SQL for the SOC team, and **containerized** the application with Docker for deployment.
- **Built** GenAI chatbot using AWS BedRock and Claude LLM with AWS Titan and Retrieval Augmented Generation to **identify** the best OData API out of 200 required in SAP S/4HANA based on employees use cases.

### Oohalo Technology Ltd - Machine Learning Intern

May 2023 - June 2023

- **Optimized** 3 TensorFlow models, performed data engineering and selected suitable ML algorithms with over 90% accuracy for 3 clients located in Hyderabad. Deployed robust scalable APIs on AWS Lambda in Python.
- **Developed** 6+ APIs in Python using FastAPI and Flask for sample demonstrations of NLP services such as malicious link classifiers and toxicity detection on the company website.

## RESEARCH EXPERIENCE

### University of Auckland - Research Intern

July 2023 - August 2023

- **Spearheaded** development and modifications to **enhance** the CLAVIN-NERD location-based entity recognition system by 5% using distilBERT in an ensemble with existing models for NZ-based company Signal Corporation.
- **Generated** use-case scenarios, extracted practical insights and explored NLP strategies with a 6-member team.

## PROJECTS

### MeetIn (Kotlin, Retrofit, Dagger Hilt, Coil, Moshi, Room, Coroutines, ViewModel)

- Android app with 100+ downloads in Play Store for VIT students with profiles, feeds, friends, and bulletin board features.
- Utilises MVVM and repository architecture with dependency injection and use-case entities with Firebase backend for storage.

### Textractify: PDF extract to RDS (Python, AWS Lambda, AWS SNS, Textract, RDS, S3 Storage VPC, CloudWatch)

- Pipeline using Pub/Sub model with Textract to extract tables and key-values from PDFs with AWS SNS asynchronously.
- Lambda functions to sanitize JSON and insert into S3 and MySQL RDS in VPC with CloudWatch monitoring dashboard.

### IDShield: Stacked FT-Transformer IDS (Python, TensorflowSklearn, Numpy, Seaborn, matplotlib)

- Weighted stacked intrusion detection system with base modified transformer using feature-tokenizer for network packets.
- Utilises SVM, LR, CART, KNN and Random Forest in voting algorithm with transformers achieving accuracy of 98%.

## EXTRA-CURRICULAR ACTIVITIES

- **Applications Lead** at International Society of Automation, **Committee Member** at Google Developer Student Club. Organized 7 hackathons/CTFs, 6 webinars, published 4 apps, and mentored 150 students.
- **2x Kaggle Expert** with highest global rank of 1,177/300K users. Youth Red Cross **Volunteer**. **8.5/9.0** on IELTS.

## COURSES AND CERTIFICATION

- Microsoft Certified: *Security Compliance & Identity*, MongoDB Basics Certification, Python for ML & Data Science Master-class, Microsoft Certified: *Azure AI Fundamentals*, Kaggle Certification: *Computer Vision*, JP Morgan Virtual Experience

## EDUCATION

### University of Illinois Chicago

August 2024 - May 2026

Master in Science - Computer Science - Data Structures and Algorithms, DBMS

### Vellore Institute of Technology, India

August 2020 - May 2024

Bachelor's in Computer Science - Computer Networks, Operating Systems (CGPA 3.8)
